TRAFFIC INCIDENT MANAGEMENT:

QUICK CLEARANCE

Why move your vehicle out of travel lanes?

- Driver Safety
- Traveler Safety
- Responder Safety
- It's the Law!

FENDER BENDER?
If you're in a minor or non-injury crash and your vehicle is operable, move it out of travel lanes.

Move your vehicle to the side of the road and inspect it there – not in dangerous travel lanes.

Often, a primary crash leads to a traffic backup and increases the risk of a secondary crash, which can be more severe than the original collision.

Vehicles involved in a non-injury crash that remain operable, according to Arizona law, must be removed from the roadway.

Emergency responders – police, fire, tow truck operators, etc. – need a safe place to work, too.
On average, a tow truck operator is struck and killed every six days in the U.S.
